

Special Lecture

特別講演

Prof. Dr. Walter Kaminsky

*Institute for Technical and Macromolecular Chemistry
Department of Chemistry, University of Hamburg, Germany*

“Development and Progress of
Metallocene/Methylaluminoxane
Catalysts for Olefin Polymerization”

Date: March 21,

Place: Lecture Hall

“His most famous effort is development of metallocene catalyst by discovery of methylaluminoxane (MAO) for olefin polymerization. Industrial developments for synthesis of new polymers by molecular catalysts have been achieved in the world.”

第119回触媒討論会特別講演

119th, Symposium on Catalysis Society of Japan, Special Lecture
