

Evening session of ISHHC-16

## The R&D Challenges Facing Japanese Chemical Companies

Hokkaido University Conference Hall

Conference Room A

17:30-20:25, August 5(Monday), 2013

Many Japanese chemical companies are carrying out Research and Development Challenges for new catalysts and new chemical processes. 4 representative Japanese chemical companies( Asahi Kasei, Mitsubishi Chemical Company, Mitsui Chemicals and Sumitomo Chemicals) will present their strategies, goals and achievements. We would like to think about the future directions from the standpoint of world-wide sustainable development of mankind.

### Program

17:30~ 17:35

**Opening T. Fujita** (Session Leader)

17:35~ 18:15 (Chaired by Yoshiaki Oda)

**Akira Yoshino** (Asahi Kasei Corp.)

“Lithium Ion Battery and Interface Reaction”

18:15~ 18:55 (Chaired by Tohru Setoyama )

**Terunori Fujita** (Mitsui Chemicals Singapore R&D Centre, Pte. Ltd.)

“New High-Performance Catalysts Developed at Mitsui Chemicals”

(Break)

19:05~ 19:45 (Chaired by Akira Yoshino)

**Yoshiaki Oda** (Sumitomo Chemical Co., Ltd.)

“Catalyst Research and Development of High Performance Materials in Accordance with R&D Strategy of Sumitomo Chemical”

19:45~ 20:25 (Chaired by Terunori Fujita)

**Tohru Setoyama** (Mitsubishi Chemical Company)

“The Diversification of Chemical Feed-Stocks and the Related Environmentally Benign Catalytic Processes”

(We will serve light meal for participants.)
